

After more than 85 years of serving the Davidson County community, Novant Health Thomasville Medical Center is ready to develop a place that will inspire and educate people of all ages, with a focus on improving the health of the community, one person at a time.

Providing patients the RIGHT level of care,
at the RIGHT time,
and at the RIGHT place.

Campaign Summary

Novant Health Thomasville Medical Center has always been on the forefront in making a positive impact on the health of our community. Right here in our region, the need for behavioral health services, chronic disease management, and rehabilitation continues to impact the lives of thousands of patients and their families each year. Together, we can protect and promote the quality of life and health of all people within Thomasville and Davidson County.

The Thomasville Medical Center Foundation has launched a \$2.6 million Capital Campaign to create the Novant Health Wellness and Education Center. The 18,000 sq. ft. former health department on the campus of Thomasville Medical Center will undergo a \$4 million dollar renovation. Novant Health is investing \$1.4 million in support of the renovation. The center will tackle some of the most difficult and complicated medical challenges today, as well as prepare us to face the issues that will confront our region tomorrow.

The Wellness and Education Center will personalize patient-centered care, improve accessibility, increase affordability, and enhance care coordination. This effort will help ensure that Thomasville Medical Center remains a strong and vibrant institution that will continue to make a positive difference in the lives of patients in Davidson County and the surrounding communities.
